

Our new collection of high-performance plant-based products are designed to give suppliers effective next gen alternatives to traditional agricultural chemicals and help their operations reduce spoilage, extend freshness, defend against diseases and improve product appearance.

The Flair S1 Advantage:

No Fruit Tempering Needed

FlairS1 can be readily applied to cold, wet fruit, leaving a uniform shine (i.e., no wax spots).

Eliminate Heated Drying

Complete fruit drying at 15 MT/h at 20°C and eliminate pre-dryers.

Reduce Conventional Fungicide Usage

Decrease fungicide application by 30% while maintaining a target MRL when dosing into FlairS1.

Achieve Higher Fruit Throughput

Process fruit on the line 15-25% faster.

Application Made Simple:

FlairS1 comes ready-to-use and integrates seamlessly into existing equipment. The unique properties of FlairS1 will lead to reduced operational costs.

Values determined from pilot studies at select partner sites. Benefits are operationally dependent.

Our products deliver value to your bottom and top line by enhancing your supply chain capabilities.

Long Lasting Shine

Eliminate Microplastics, Non-Vegan Ingredients

Consolidate Treatment Steps

Reduce Overpack

Expand into New Markets

Conventional Wax

flairS1™

Retained mass and firmness with improved color and quality through the supply chain.
